All relevant financial relationships have been mitigated and resolved using one of the following mechanisms:

- 1. Peer Review of content (PowerPoint presentation, manuscript or any other materials that provide information about the content of the presentation) to ensure presentation is balanced.
- Moderators with a financial relationship will have a co-moderator who has no relationships. Co-moderator will ensure that the potentially conflicted moderator does not make treatment recommendations and remains unbiased during his participation.
- 2. Change the content of the person's assignment.
- 3. Limit the Content to a report without recommendations.
- 4. Replace the faculty member.
